Experience

AI-Native Developer & Founder

April 2025 - Present

Moyrith

Remote

- Planned, scoped, and shipped a full SaaS product, browser extensions, and an automation pipeline end-to-end, owning product direction from idea to live revenue.
- Directed AI coding and media agents (Emergent, Bolt, v0, Lovable, Claude, Gemini, Nano Banana 2, GPT Image 2.0) via structured prompting to generate production-ready codebases, landing pages, and video/image assets.
- Migrated a full React.js codebase to Next.js in 2 days by orchestrating Emergent and Gemini through a multi-step prompting pipeline.
- Executed monkey testing on AI-generated applications to catch edge cases before and after deployment.
- Marketed shipped products across LinkedIn, X, and Product Hunt to drive user acquisition.

QA Intern

Mar 2026 - May 2026

The Hope International

Remote

- Validated backend APIs (GET/POST, JSON payloads) via Postman, troubleshoot network traffic with Fiddler, and executed automated UI testing with Ghost Inspector.
- Managed issue tracking and logged defect tickets across Jira and Trello.
- Identified a critical z-index UI rendering defect on the university portal and authored a report proposing the fix.
