EDUCATION

- **Middle East University** Amman, JO
Bachelor of Science in Computer Science; GPA: 3.26 *Oct. 2022 - July 2026*

EXPERIENCE

- **Moyrith** Remote
AI-Native Developer & Founder *April 2025 - Present*
 - **Product Development:** Ship and scale SaaS products solo, from idea to live users and revenue
 - **AI Orchestration:** Direct AI agents (emergent.sh, bolt.new, v0.dev, aura.build, omma.build) to generate full codebases and high-converting landing pages
 - **Quality & Security:** Specify WCAG requirements and OWASP Top 10 security rules before generation, then manually refine the output
 - **Testing:** Monkey test AI-generated apps to catch edge cases before deployment
- **The Hope International** Remote
QA Intern *Mar 2026 - May 2026*
 - **API & Network Testing:** Validated backend APIs (GET/POST, JSON payloads) via Postman and troubleshoot network traffic using Fiddler.
 - **Test Automation:** Executed automated web UI testing workflows using Ghost Inspector.
 - **Agile Workflows:** Managed issue tracking and logged defect tickets across Jira and Trello environments.
 - **Bug Tracking:** Identified a critical z-index UI rendering defect on the university portal (map pins overlapping navigation elements) and authored a comprehensive report proposing the frontend fix.

PROJECTS

- **Marksy (Website):** Bookmarks Auto-Categorizer and Organizer SaaS (\$4.99/mo) — Started as MVP with bolt.new, migrated to Next.js via emergent.sh. Served as graduation project (A-).
- **Tabsty (Website):** Tabs Manager — monetized browser extension (.zip, \$4.99 lifetime) available on Whop.
- **Bulk YouTube Upload Pipeline:** Local n8n workflow (7 nodes) — uses custom JavaScript to upload one video 6 times to YouTube in two title/description variants (3 each), with rate-limit waits and Telegram confirmation. Built with Claude and Gemini guidance for local setup and workflow architecture.

PROGRAMMING SKILLS

- **Languages & Styling:** HTML5/CSS3, JavaScript (ES6+), React, Tailwind CSS, Figma
- **Frameworks & Backend:** Next.js, TypeScript, Supabase
- **AI Orchestration:** n8n, Prompt Engineering, API Orchestration, Agentic Workflows
- **AI Tools & CI/CD:** Bolt/Lovable/Anything/v0/Emergent, Aura.build/Omma.build, Git/GitHub, Vercel/Netlify
- **Languages:** Native Kurdish, Fluent English, Fluent Arabic
